Ceasefire 2G Insecticide – 2 g/kg bifenthrin

Ceasefire 2G Insecticide is for the control of a range of insect pests in turf and external building surrounds situations as per the Directions of Use.

Ceasefire 2G Insecticide is registered for the control of a wide range of household and lawn insect pests including a variety of ant species, ticks and fleas, this product is ideal for use in public and private buildings and lawns.

Being non-scheduled it can be used in schools and government sites where other insecticide products are restricted. It is ideal for treating pests that harbour between cracks and crevices such as between pavers and structural cracks.

The sand granules are poured or brushed into these cracks where they sit in the treatment zone effectively killing the problem pests and leaving residual protection with little or no site disruption. Ceasefire 2G Insecticide can also be used when extended rain periods limit the use of liquid sprays or in areas where spraying liquid insecticides is not practical or possible. Ceasefire 2G Insecticide is also suitable for use on lawn pests such as ants, lawn grubs and beetles.

Ceasefire 2G Insecticide is a tan, ready to use sand based granule specifically designed for the professional pest management industry. The unique formulation technology of Ceasefire 2G Insecticide gives each granule perfect flow-ability making applications more accurate and easier to apply.

Ceasefire 2G Insecticide is unscheduled, odourless, non-staining and non-sensitizing, providing a cost-effective solution to pest management.

Benefits:
- Unique Easy to Spread sand formulation
- Ready to use
- Suits most broadcast machinery
- Minimal site disruption required.
- Non-scheduled
- Odour free, non-staining, no phytotoxicity
- Broad spectrum
- Fast knockdown and long residual
- Cost effective and convenient to use
Ceasefire 2G Insecticide

**DIRECTIONS FOR USE**

**Restraints:**

DO NOT apply inside buildings.

DO NOT apply within 2m of water (ponds, drains etc).

<tr>
<td></td>
<td>Black ants, Coastal Brown ant, Funnel Ant, Sugar ant, Stinging ant only</td>
<td>60 - 220</td>
<td>0.6 – 2.2</td>
<td>Broadcast Ceasefire 2G Insecticide with suitable application equipment to ensure uniform coverage over the treatment area. Apply granules to areas where ants are active. Where possible apply granules directly to the nests. Use the low rate for maintenance treatments or to control light infestations and the high rate for heavy infestations and for maximum residual control. The elimination of Funnel ants from a particular site will generally require more than one application. Initial applications should be broadcast over the affected areas. As the initial numbers of active colonies is reduced, application should shift to targeting active mounds. Apply granules directly to the mound and in the area immediately surrounding active mounds (300mm radius).</td>
